DISCOVERY
CAMP 2019

The Judson University Design Discovery Camp is a week-long day camp that is geared to provide middle- and high-school aged students to explore and discover design and architectural foundations, while gaining an understanding of what it means to become an architect.

The week is filled with a visit to Denver, presentations from Judson faculty, and foundational design projects. The students are exposed to formal and spatial exercises and multi-step projects focused on divergent thinking and creative problem solving.

For a tentative schedule, visit judsonu.edu/archcoloradocamp
To discover more about the disciplines of architecture and interior design.

To explore various roles of architects and interior designers in culture and society.

To understand the various processes that lead to professional work and licensure.

To learn the common components of design curriculum and engage in a design charette.

To experience the architecture and design of Denver.
Alan Frost, RA, LEED AP, teaches design courses in the third year and graduate levels. As a designer, thinker, and fabricator, his interests occupy the intersection of the practical and conceptual; exploration and critique; and making and thinking. He believes that creating designs infused with layers of meaning leads to a deeper and richer experience of the built environment. Professor Frost has served as the Director of the Digital Fabrication Lab at Judson University, where he trained and mentored students in the use of laser cutters, 3D printers, and other digital fabrication tools. He is a registered architect in the State of Illinois and has more than 15 years of experience working in a variety of architectural practices, from small design-build contractors to large international design firms.

Josh Wixom is the self-titled “Mathemagician” at Springs Studio. Josh is a native of Colorado Springs, and he graduated from Coronado High School. He attended the University of Colorado Boulder and graduated with a degree in Architecture. Since graduating with his degree, Josh has worked in business and become a teacher, eventually joining Springs Studio. In 2018, Josh presented two new courses at Springs Studio to District 49 in Architecture and Urban Planning.

JaDee Harsma is a senior associate at DLR Group, a global architecture firm. Her vast knowledge and personal interest in architecture and graphic arts give her an edge of creativity and innovation that is evident in her designs. She was the design leader for the AIA award-winning Springs Studio for Academic Excellence adaptive reuse project, turning an abandoned warehouse into an innovative K-12 academy in Colorado Springs. Her dedication to sustainability and energy efficiency has made her an extremely effective high-performance building design specialist. Harsma’s certifications include Green Globe Professional and LEED AP BD+C from the U.S. Green Building Council.

Springs Studio will host Judson University’s summer camp geared towards helping students experience what it might be like to pursue a degree in architecture.

Judson University’s unique architecture program aspires to be a global leader in architectural education. Founded in 1997 and fully accredited, Judson’s architecture program is widely acknowledged for its innovative approach to architectural education.

Springs Studio for Academic Excellence (formerly the Falcon Virtual Academy) engages students in an innovative, rigorous digital learning environment that prepares them for the 21st century and beyond.
