Computer Based Assessments

The Ed Tech team provides support for computer based assessments by ensuring the technical readiness of online assessment platforms. In partnership with Colorado Computer Support, D49’s contracted IT service, the Ed Tech team tests, verifies, and implements the associated technologies along with the support infrastructure used for assessments. Lab and device audits are conducted prior to the testing windows for state mandated assessments such as CMAS (Colorado Measures of Academic Standards). In addition to support for CMAS, the Ed Tech Team provides support for other assessment and progress monitoring platforms such as WIDA ACCESS for english language learners, ACT Aspire, Math and Reading Inventory by HMH (formerly Scholastic), AimsWeb Plus, and KITE-Dynamic Learning Maps.
