BOE Honors Elementary School Achievements

By Dustin Senger
Digital Communications Manager

Elementary school students lined up for "Fantastic 49" recognition Feb. 9, ahead of a Board of Education meeting.

The students, selected for various reasons, took turns approaching the panel of Board of Education directors. Each time, teachers stood at a podium to explain why a student demonstrates amazing potential, as a learner and a leader.

Tailor Fecteau, 11, a fifth-grader at Stetson Elementary School, was recommended for recognition from the Board of Education by music teacher, Becca Garner.

"Tailor excels in all she does," says Garner. "She sang a solo during the fifth-grade musical, and went above and beyond helping others with their costumes. Tailor comes highly recommended (for recognition) by not only me, but also by every teacher she visits."

Ingrid Daniel, a gifted and talented education teacher, joined Tailor during the public recognition. "She is constantly working hard and challenging herself," says Daniel. "She is an amazing musician, and she is a very creative thinker."

Laiyla Brewer, 6, a kindergartner at Remington Elementary School, was recommended by teacher Bonnie Bonser. She became the youngest student to achieve formal recognition from the district’s Board of Education.

"I have a pretty remarkable child," says Bonser, highlighting Laiyla as a caregiver, from her family to her peers. After Bonser asked Laiyla to explain what

Kids' Corner to Expand into POWER Zone, Falcon Zone

By Dustin Senger
Digital Communications Manager

With nearly three years of success in Sand Creek Zone, District 49’s Kids’ Corner is set to become the district’s premier choice for before and after school activities and care. Kids’ Corner will officially open districtwide June 1, as summer camps kick off. The before and after school program will replace Champions in POWER Zone and Falcon Zone, effectively operating in all of the district’s coordinated elementary schools.

"With Kids’ Corner, we gain an increased ability to shape our before and after school opportunities, so they best accommodate changing educational priorities," said Dr. Michael Pickering, POWER Zone superintendent.

“We’ll also achieve important fiscal benefits for our students, so we’re becoming more effective and efficient in our support for families,” said Pickering. “We’re taking advantage of economies of scale.”

Kids’ Corner Pilot

During meetings in 2014, district administrators and Board of Education directors discussed the establishment of Kids’ Corner in Sand Creek Zone. In June 2014, they unanimously approved a separate fund to help measure its financial efficiencies.

Sean Dorsey, Sand Creek Zone superintendent, had explained a goal to provide elementary school families quality

As kindergartners strolled into Mary Hopper’s classroom March 14, they found themselves surrounded by tables with construction paper, cardboard, markers, crayons, felt, yarn, glue, scissors – items typically found in elementary schools. However, she didn’t give the students of Woodmen Hills Elementary School a typical set of patterns and instructions. After putting them into small groups, she gave them a goal, and encouraged creative thinking and social skills to reach it.

“What’s the word we’ve been learning this year?” said Hopper, walking between the tables of students, each 5-6 years old. Together, the children said, “cooperating.”

Hopper, a project-based learning teacher, is part of the school’s specials rotations. Throughout each school year, students from kindergarten to fifth grade enter her classroom to progressively explore and lead hands-on, collaborative opportunities. Ahead of St. Patrick’s Day, she divided kindergarten classes into three groups.

One group created a leprechaun, requiring individual attention on a hat, a face, a beard, a shirt, a buckles, pans and shoes. Students had to coordinate their efforts to ensure all the parts would fit together, logically and proportionally. As a leprechaun formed, two other groups would focus on mushrooms and a rainbow. As Hopper toured tables, she asked students to explain what they’re working on, and why. She looked for understandings emerging from interactions.

“Sure, there are arguments and hurt feelings at times,” she says, “but disagreeing with one another is a normal part of life. Working through that develops leadership as well as the ability to compromise.”

However, she didn’t give the students of Woodmen Hills Elementary a typical set of patterns and instructions. As Hopper toured tables, she asked students to explain what they’re working on, and why. She looked for understandings emerging from interactions.

“I thought Riley wanted hands on him!” said Hopper, mitigating disagreements and ensuring all student ideas were heard. Two students started tracing an outline of their hands, and then cut them out, as another collected scraps and stacked pencils.

“I really want the students to learn that strong collaboration definitely involves speaking — sharing input with others — but most importantly, listening to what other group members have to contribute,” said Hopper.

“The best ideas tend to come from shared decision-making,” she says.

As students identified problems and solved them, a diversity of personalities surfaced, from organizers to leaders. Hopper says kindergartners use collaborative projects to learn more about how they best relate and coordinate with others.

Yo-yos Help Students Display Virtuous Character Traits Through Ups and Downs of Life

By Matt Meister
Communications Director

Students at Rocky Mountain Classical Academy attended "The NED Show" March 17 in the charter school’s commons area. Kindergarten through fourth grade students attended a show to begin the school day. A second performance for older students was scheduled prior to the lunch period.

"The NED Show" features a cartoon character named NED who helps teach three important skills to students. NED’s name serves as an acronym that makes the show’s message easy to remember—“Never give up. Encourage others. Do your best.”

“The NED Show’ has been performed across the world, in Canada, New Zealand, the United Kingdom and here in Colorado,” said Mike Wedor, Rocky Mountain Classical Academy principal, introducing the show.

A banner above the commons displays character traits RMCA students are expected to develop and model. The traits create an acronym for the school’s mascot: Kindness, Nobility, Initiative, Generosity, Honesty, Trustworthiness, and Self-Awareness.

“We want to motivate our kids to display quality character in every aspect of their life,” said Wedor. “This is yet another opportunity to learn how to model those character traits whether they are at school or somewhere else.”

The show, a production of the All for Kids Company, combines humor, magic and yo-yo tricks with a story about the benefits of displaying quality character traits.

“It’s a character motivation assembly teaching the kids how to be champions at school and in life,” said Andrew Booth, the solo performer of the ‘The NED Show,’ when asked what the performance would mean for students.

“Good morning Andrew!” students screamed in unison at the beginning of the assembly. During the performance, the students met NED, who wants to be a yo-yo trickster. Booth told the students a story about NED’s “around the world” journey meeting different people.

“NED made poor choices that day and those choices made him feel bad,” said Booth.

As the show continued, students learned how NED makes changes and becomes a champion in life. Like NED, students are inspired to “Never give up. Encourage others. Do your best.”

In a magic trick involving two different colored strings, a knot tied in a white string, representing the knowledge and wisdom of teachers, “moves” to a red string, representing students, as they interweave.

“You keep trying, because you’re a champion,” said Booth, twirling the strings together. “So you listen to your teacher, cause that’s the plan. You do your homework the best you can, and you ask questions when you don’t understand.”

“When you do those things,” continued the performer, “you create learning magic between you and your teacher and you have something you’ve never had before.”

What? yelled the students in unison as Booth untangled the strings, yielding the transfer of knowledge, or the “learning magic.”

The show encouraged students to learn from mistakes, rely on teachers and others adults for support, and to persevere when things become difficult.

“If you want to be awesome at something, be a champion at something, you’ve got to work at it,” said Booth, performing a series of yo-yo tricks. “You can’t just learn to walk the dog with your yo-yo right away, you have to practice.”

RMCA students were able to purchase ‘The NED Show’ yo-yos in the weeks after the performance.

“The yo-yos aren’t just a way to learn to persevere,” said Booth. “It’s a way to pay it forward. Proceeds will go to bring the message of ‘The NED Show’ to another school for free, just like we’ve been able to do here at RMCA.”

Cameron Lewis, left, 6, and Jayda Joe, 7, both first-graders at Rocky Mountain Classical Academy in District 49, react to a magic trick March 17 during “The NED Show.” Performed by Andrew Booth of All for Kids Company. “The NED Show” features a cartoon character named NED who helps teach three important skills to students. NED’s name serves as an acronym that makes the show’s message easy to remember—“Never give up. Encourage others. Do your best.” The show encouraged students to learn from mistakes, rely on teachers and others adults for support, and to persevere when things become difficult. (District 49/Matt Meister)

PIKES PEAK
EARLY COLLEGE

Are you ready for college but find the traditional school environment isn’t working for your schedule? PPEC is the perfect match for your academic needs. Our innovative, individualized college preparatory learning experience makes free college a viable option for all students.

FREE COLLEGE TUITION • UP TO 15 CREDITS PER SEMESTER

PPEC teachers provide a rigorous, innovative learning environment that prepares students for their college aspirations and career passions. Our flexible, innovative model builds student resiliency, time management, self-advocacy and problem solving skills through a targeted curriculum focused on college preparedness.

Prepare Every Student

College Prep

We know that not all learning happens on the traditional school calendar. Our blended learning environment provides flexible scheduling and individualized pathways combined with face-to-face virtual interactions, preparing students for life in college and the workforce.

Hats and Socks, Hams and Fox,
Celebrating Dr. Seuss at SRES

By Matt Meister
Communications Director

“Today is my favorite day,” said Gabriel Ben, 8, Springs Ranch Elementary School third-grader. “It’s mismatched socks day because of ‘Fox in Socks’ who does a lot of silly stuff.”

On Feb. 27, students and staff began celebrating Read Across America in honor of Dr. Seuss’ March 2 birthday. The Sand Creek Zone school’s front office, hallways, classrooms and lunch room were bursting with characters and decorations based on Seuss’ books.

Special classroom activities and a school assembly helped mark the celebration.

Falling between Christmas break and spring break, Dr. Seuss’ birthday comes during the longest academic stretch of the year. Teachers welcome the opportunity to shake things up.

“They get to see us in a different light,” said Brian Happerle, Gabriel’s teacher. “We get to tie in the fun with the academics and it’s a good way to freshen up what’s important.”

The third grade class was kicking off the week dedicated to celebrating the joy of reading by creating trees inspired by Seuss’ book, “The Lorax.” Students hung their completed projects up in the hallway outside the classroom.

Even through the fun, the importance of reading isn’t lost on the learners.

“We’ve got to read well,” said Gabriel. “If there’s a sign, like, ‘do not disturb for testing,’ you need to be able to know what that means.”

“And there’s something a little extra special about having fun while learning,” said Happerle. “Plus, I look normal when my socks don’t match this week!”

More than a dozen students assembled in the Odyssey Elementary School library March 16 to celebrate the conclusion of a schoolwide community reading experience.

Students, staff and families at the Power Zone elementary school read “Kenny and the Dragon” together during the first three months of the year. The book, written by Tony DiTerlizzi, is a retelling of the literary classic “The Reluctant Dragon,” originally published by Kenneth Grahame in 1898.

“You get a united sense of sharing the experience of the book,” said Katherine Nunn, library paraprofessional, who led the schoolwide efforts to read the novel. “The students know they can talk about it with each other and with their teachers.”

Community members, English instructors at other POWER Zone schools, and District 49 leaders joined Odyssey Elementary School staff in recording chapters for students to follow along with at home.

“We know parents may be working at night or have other responsibilities to attend to so we wanted to make sure that our students had someone to read along with them in the evening,” said Nunn.

As the experience of reading the novel came to an end, Nunn invited interested students to paint or draw a sunset, just like Grahame, the dragon character in the story. “Kenny went to visit Grahame and he would be sitting on a hill painting sunsets and listening to music,” Nunn said while describing the inspiration from the novel. “Kenny normally came to see the dragon after school when the sun was setting and it was getting dark.”

As a reward for this extra effort, Nunn hosted the student artists in the library to enjoy one of Grahame’s favorite treats. “We are all going to try this,” said Nunn, lighting a kitchen torch to caramelize sugar on the top of several creme brulee desserts. “Do you think Grahame did it faster?”

“He blew fire from his nose,” said first-grader Carter Oliveto, 7. “If we make this dessert, maybe Grahame will come to our house.”

“It smells like s’mores because it has sugar in it,” said fourth-grader Hayden Newberg, 9.

“In the book it talks about how other dragons are mean,” said Hayden, “but Grahame isn’t.”

“So what do you think that tells us about our life?” asked Nunn, handing the creme brulee to the students.

“We are all going to try this,” said Nunn, lighting a kitchen torch to caramelize sugar on the top of several creme brulee desserts. “Do you think Grahame did it faster?”

“He blew fire from his nose,” said first-grader Carter Oliveto, 7. “If we make this dessert, maybe Grahame will come to our house.”

OES Reads Together: Sweet Lesson, Sweet Treat

Odyssey Elementary School fourth-grader Hayden Newberg, 9, digs into a creme brulee dessert March 16. More than a dozen students assembled in the library celebrate the conclusion of a school-wide community reading experience by eating creme brulee, a favorite of Grahame, a dragon in the novel “Kenny and the Dragon” by Tony DiTerlizzi. The students did extra work at the end of the novel, creating sunset artwork inspired by DiTerlizzi’s retelling of “The Reluctant Dragon”. Students, staff and families at the Power Zone elementary school read the book together as a community during the first three months of the year.
ALLIES to Open in August

The tuition-free public school of choice will serve struggling readers in second through fifth grade, helping them overcome learning differences and finally ‘take flight.’

By Matt Meister
Communications Director

A specialized program that started as an innovation within one elementary school will expand and open in August as the Academy of Literacy, Learning & Innovation Excellence in District 49’s POWER Zone.

“ALLIES aims to make a difference in the lives of students with language-based learning difficulties and characteristics of Dyslexia,” said Rebecca Thompson, director of academic services.

The school will use the Orton-Gillingham based Take Flight intervention, delivered by certified academic language therapists, in 50-minute sessions each day to help students overcome their struggles. Core classes will be taught by instructors who understand and accommodate for characteristics of dyslexia.

“Students at ALLIES will succeed in a caring and supportive environment that accommodates for their needs and draws on their strengths,” said Thompson.

For more information about ALLIES and to fill out an expression of interest form, visit D49.org/ALLIES.
Fun Run Boosts Character, Physical Activity and Financial Support at RES

By Matt Meister
Communications Director

More than 100 parents joined Remington Elementary School students and staff in Remington Park March 9 for the school’s second annual fun run. The run is part of a two-week fundraising campaign that includes leadership and character development in daily classroom huddles.

“It’s great that they are keeping kids active,” said Amanda Rhea, a parent of three students at the Sand Creek Zone elementary school. “The kids get to be involved in fundraising, earning things for their classroom and teachers.”

Students raised $13,000 in pledges for teacher development and classroom grants before the run. To reach their goal of $15,000, the children will continue to collect sponsorships and donations for one week after the run. Students request a sponsorship amount for each lap they complete. Students aim to complete 35 laps during the event. Each student wears a fun run grid on the back of their shirt to keep track of their progress. Parent volunteers and teachers make a mark on the grid each time a lap is completed.

Parents and grandparents cheered the Remington Elementary School student body on during the fun run and walk. “The parental support today gives the kids an extra boost to keep going and shows the kids so much love,” said Rhea.

“I love it, it’s highly organized,” said Rocio Padilla, RES school counselor and parent. “The people that come have so much energy and the kids love it.”

Elementary School student body on during the fun run and walk. “The parental support today gives the kids an extra boost to keep going and shows the kids so much love,” said Rhea.

“Getting physical activity for an hour and then we’ve got time for learning the rest of the day,” said Lisa Fillo, principal. “We’re all involved. Kids are getting physical activity for an hour and then we’ve got time for learning the rest of the day.”

Students say the physical activity is a highlight of the program. "I remember this from last year," said first-grader Nora Alyousefi, 6. "I remember this from last year," said first-grader Kayah Jones, 6. "I know I’m running faster than last year!"

Students aim to complete 35 laps during the event. Each student wears a fun run grid on the back of their shirt to keep track of their progress. Parent volunteers and teachers make a mark on the grid each time a lap is completed.

Representatives from Boosterthon, a company that helps organize the fundraising efforts, also promote leadership through character development lessons in each classroom leading up to the event.

“They have huddles in each classroom,” said Padilla, “just yesterday my daughter was talking about the importance of grit, even if things are hard.”

The broad scope of activities related to the program provide benefits for the entire school community.

“It’s a community event for the kids, parents and teachers,” said Lisa Fillo, principal. “We’re all involved. Kids are getting physical activity for an hour and then we’ve got time for learning the rest of the day.”

Students say the physical activity is a highlight of the program. "I remember this from last year," said first-grader Nora Alyousefi, 6. "I remember this from last year," said first-grader Kayah Jones, 6. "I know I’m running faster than last year!"

Kids’ Corner

From page 1

activities and care on scheduled school days, as well as during early release, assessment and professional development days. By operating as an internal non-profit entity, rather than through vendor contracts, the program stood to make a positive impact on revenue earmarked for professional development and instructional technology, after paying operating expenses.

A dedicated team began delivering daily hands-on science and art experiences, as well as movement activities, like soccer, jump rope and basketball. With weekly themes, Kids’ Corner activities were orientated to engage diverse age groups with choices.

“We offer a choice to participate in one or all of our daily activities, such as art, drama, science, sports, group activities and homework help,” said Kayla Martinez, Kids’ Corner program manager, who has helped lead the initiative since 2014.

“We provide a daily exploration curriculum that keeps children engaged, making healthy choices and interacting with friends,” said Martinez, while explaining how enrollment numbers have doubled since the initiative began.

She says Sand Creek Zone parents frequently praise the program. “Our staff members are highly qualified and trained district personnel,” says Martinez. “Everyone receives 15-plus hours of professional development each year, creating a growth mindset that will continue to build a great before and after school program.”

Martinez says the program has realized significant revenue streams for classrooms. During the 2016-2017 school year in Sand Creek Zone, located in the district’s urban southwest area, Kids’ Corner generated tens of thousands of dollars in direct benefit to host schools.

Kids’ Corner Expands

Throughout summer break, children enrolled in each zone’s Kids’ Corner summer camp will travel on field trips, learn from guest speakers, make new friends and engage in activities. Daily choices will focus on science, technology, engineering, arts and math. Families who register early benefit from lower registration fees.

During the 2017-2018 school year, Kids’ Corner will be open from 6 a.m. until the school bell rings, and then after school until 6 p.m. It’s also available from 6 a.m. to 6 p.m. on non-school days, including seasonal breaks.

Kids’ Corner is licensed by the State of Colorado. All services are unavailable during federal holidays, and when adverse weather conditions result in a district closure. For more information, to include enrollment, visit D49.org/KidsCorner.

To get the Kids’ Corner link in a text message, send key word KidsCorner (one word) to 332-33.

Elementary Honors

From page 1

she likes most about school, she said, “When you read to me,” and “I like to make friends and be nice.”

While it was long-term substitute teacher Brittany Michaud who recommended Natalia Roach, 8, a second-grader at Odyssey Elementary School, it was teacher Ashley Bergland who joined her during the public recognition. Bergland had recently returned from an extended absence.

“From the very first week of school I knew that this little girl was going to capture my heart,” said Bergland, wrapping her right arm around Natalia’s shoulder.

“I had no idea how much she would teach me about courage, strength and resilience,” she said, explaining how they both recently experienced a loss in their families.

“When I had to step out of the classroom for a period of time,” said Bergland, “she continued to impress as she demonstrated courageous leadership qualities in my absence. … Instead of giving up when she struggles, she finds a way to work through the frustration and reach a solution.”

“She also has a contagious passion for learning. When she shows excitement during a lesson, other students follow suit and become excited as well.”

Natalia’s advice to other students is to simply be themselves, because that’s what makes them special.

Madison Nahrgang, 10, a fifth-grader at Springs Ranch Elementary School was recommended by Principal Jim Kyner, who cited her commitments to reading, like registering more than 1,500 hours in the school’s master reader’s program, and passing a quiz for all 48 books used during Battle of the Books, a competition that tests character knowledge and story comprehension.

Madison is also known as a top innovator and problem-solver in the school’s robotics club, and an enthusiastic member of school choruses and plays.

Teacher Lani Bryan faced Madison, and listed the teachers who’ve felt most fortunate to work with her, from kindergarten to fifth grade.

“Maddie has just been an all-around wonderful kid,” said Bryan. “She just has the most positive attitude — she is a wonderful learner. … Every time that she does any assignment, she’s extremely thorough. She is very open to constructive criticism, and she has a very growth-minded mindset, where she knows she can always improve.”

“But what really impresses me is her compassion for other students.”

When Bryan asked for her advice to new students, Madison said, “You just need to always be positive and try hard, and never give up because you may regret it.”

Melissa Ardolf, physical education teacher at Falcon Elementary School of Technology, introduced second graders participating in the school’s first year of Drums Alive.

Ardolf had coached a two-week lesson in Drums Alive this school year for students in kindergarten through fifth grade.

The second graders from FESoT demonstrated a performance of Drums Alive, a research-based program combines general education, personal fitness, cardiovascular conditioning, neuromuscular coordination and musical rhythms. The drumming exercises are designed to socially improve physical, emotional and mental health in children.

The school’s student council raised the funds to purchase the curriculum, while a Kaiser Permanente Thriving Schools grant helped with securing the equipment, like the drumsticks, fitness balls and plastic tubs.

“It’s a fun and different way of exercising — kids love to dance and listen to music,” says Ardolf.
