Welcome Future 4th Grader!

You should be very proud of all of your hard work and accomplishments this year in third grade. You will have the summer to enjoy the beautiful warm weather and the outdoors while you begin preparing for Fourth Grade. It would be great if you practice your third grade skills so that you can be the best fourth grade student that you can be next year. Here are some tips to help you prepare for 4th Grade.

### Reading

It is important to read over the summer. Tell someone about the story you read. Describe the characters and what happened in the story.

Students should be able to describe characters in a story and explain how their actions contribute to the sequence of events.

Visit the public library and check out some new and exciting books.

Or visit <https://ppld.org/> to see all of the new ebooks.

Sit under a shady tree and have fun reading this summer!

### Writing

How about keeping a journal this summer? Practice writing about the fun activities you participate in and tell about the places you visit with your friends and family.

Try writing a paragraph focusing on adding more details and descriptions about one of your favorite places that you enjoyed visiting.

### Helpful Resources:

#### Reading

- MyOn - login to Clever and Renaissance Learning
- Lexia - Core5.com

#### Math

- ST Math
- Zearn - review lessons from 3rd grade
- XtraMath - practice math facts

### Math

Students should have a strong understanding of place value by the end of third grade. Students should be able to fluently add and subtract multi-digit numbers with zeros.

If you do not have all of your addition and subtraction facts memorized, please practice and master these over the summer and then move onto multiplication and division facts.
