

Peyton Advanced Cabinet Manufacturing

Peyton's Advanced Cabinet Manufacturing Program is a one to four year program designed to teach students manufacturing skills and techniques required in today's global economy. Students who complete this program are trained and experienced in using state-of-the-art tools and machinery associated with the advanced manufacturing industry.

Why choose the Peyton Cabinet Manufacturing Program?

- All the materials and supplies are provided at no cost to the student
- Students keep all the projects they build
- Students will learn skills that prepare them for various manufacturing careers
- Students learn leadership skills
- Students can join Skills USA a student led leadership organization
- Students can participate in regional, state, and possibly national competitions

Credits, Certification, and Internships

- Students can earn 4 credits per school year, which could include math and elective credits, depending on your school district
- Students can earn Woodwork Career Alliance (WCA) Certifications
- Students will have the opportunity to meet with industry employers and apply for internships
- Students who are 17 ½ or older will have the opportunity to apply for industry jobs
