

## **Developmental Screenings for Preschool Age Children**

The National Association for the Education of Young Children (NAEYC) guidelines recommend the screening of young children to identify those who may have special learning or developmental needs as well as to plan appropriate curriculum and instruction.

District 49 Early Childhood Education staff will be offering developmental screenings (to include vision, hearing, and dental) for D49 resident children between the ages of 2 years, 9 months until they are eligible for kindergarten (child is 5 before September 15 of that school year). Screening will be by appointment only and you are welcome to sign up using the 23-24 Screening Appointment link on our webpage at [d49.org/preschool](https://d49.org/preschool). Each location's date/times will open for appointments up to four weeks prior to that screening date. Families are welcome to attend any screening regardless of the zone in which they reside.

If you are concerned your child is not meeting typical developmental milestones in the areas of play, early academics, communication, movement and/or demonstrating significant adverse behaviors or if you suspect that your child has a significant developmental delay that could impact their education, please contact our Child Find office by emailing [childfind@d49.org](mailto:childfind@d49.org).
